

TWMW: Tru-Weep™ Midwall Vent

The Tru-Weep™ Midwall Vent is a two piece horizontal control joint specifically designed to be used with drainage mat. This unique design allows for the top of the wall to drain moisture, and the bottom of the wall to vent air at the same midwall reveal. Weep slots are located along the back of the sloped legs in alignment with the drainage mats to allow water and air to efficiently exit the stucco assembly.
