

Stockton Products™ Radius Shapes Quote Form

Many of Stockton's metal products can be ordered curved. For tight radius requirements, certain shapes have minimum curving ability based on the radius dimension and direction needed.

Due to the curving process, only 8 usable feet are available from a 10' length. Please indicate the amount of material required in usable feet. All material will be rounded up to a 10' length (example, 54' usable will be rounded up to 60'). Please specify the **Point of Measurement** (face of plaster, face of framing, center of reveal, etc.), as well as the **Radius Type**, direction of the curve from the diagrams on this page.

Note: The radius is pulled towards the arrow that appears on each diagram of the types of curves available.

RADIUS – TYPE 1	RADIUS – TYPE 2	RADIUS – TYPE 3	RADIUS – TYPE 4
