

Introduction & Company History

Contractors

We proudly serve the lathing, plastering, panel system and fireproofing industries with a wide variety of vent & reveal screeds, metal trims and aluminum extrusions. We also offer the most complete line of pre-shaped welded wire accessories to be used on corners, arches, doorways, windows, walls and foundations. Our products insure ease of application and proper plaster thickness. We use the finest metals and wire in all of our products which offer maximum strength, easy tailoring and rust resistance.

Call 1-87-STOCKTON (1-877-862-5866) for the name of your nearest Stockton Products™ dealer.

Building Material Dealers

We diligently guard our solid reputation for excellent design, excellent quality and excellent service. We are committed to having your every contact with our staff be a positive and professional experience. We carry a large inventory of most items in each of our distribution centers and offer a special order service for unusual and non-standard items. Stockton Products™ is always receptive to your new product ideas and needs. Call us at 1-87-STOCKTON.

Architects

For 60+ years, we have offered architects a full line of lathing and plastering accessories to meet the challenges of creative architectural design. Our welded truss design, of the finest galvanized wire, builds into the structure a superior strength and is easily aligned and applied over stucco netting. The end result assures...

- Corners sculptured to your design
- A solid reinforced corner, with mechanical bond
- Straight line on the arris, canopies, balconies and corners

Our complementary line of metal trims and aluminum extrusion products also enjoy great popularity and acceptance because they meet the practical design requirements necessary both from an aesthetic and functional perspective.

For confidence in structural integrity and an adherence to your creative design requirements, specify Stockton Products™.

Disclaimer

Stockton Products™ was founded in 1949, in response to construction demand in the Southwestern United States, particularly California. Exterior stucco applications were popular and widespread. Recognizing the need to provide a framework around which stucco could be applied and keep it from cracking at stress points, a welded wire corner was developed which met that construction need. It was known as CornerAid®, and quickly became, and remains, the industry standard. Since then, a variety of products have been developed that save time, while maximizing stucco adherence to the wire-reinforced exterior. In addition, certain drywall related products are also manufactured.

Just as the company's origins sprang from identifying and meeting a particular need, Stockton has continually sought other means of doing so for today's contractor/builder. In 1989, Stockton acquired Casings Western, a roll-forming manufacturer of galvanized steel products which has developed a complete line of soffit vents, decorative reveal screeds and other trims which complements nicely the wire products which have long been associated with the Stockton Products name.

In 1999, Stockton introduced a line of extruded aluminum drywall and plaster moldings to further enhance its trims offerings.

The combined product lines now sell exclusively under the Stockton Products™ logo. We invite you to peruse our catalog to determine if our family of products could enhance your ability to meet the needs of your customers.

Did you know?

- Stockton Products added Fiber Cement Board moldings to our already large Extruded Aluminum section. See pages 64-80 and look for the "New" icon!
