

This conversion chart identifies Superior items and the equivalent product from Stockton. The Superior items are in alphabetical order as displayed in the Superior catalog. Below each Superior product is the corresponding Stockton product code. We make virtually every Superior product. However, because of limited demand not all are included in our catalog. (Stockton Products' also manufactures several products that Superior did not carry; we also manufacture custom products.)

We maintain a solid inventory of the most commonly used G90 galvanized products, but with thousands of different product configurations, most products are manufactured upon order with a three to five day turnaround. Large orders, and custom and speciality products may take up to seven days. It's always wise to call well in advance of the desired delivery date. Many products shown below are also available in, copper, zinc, stainless steel and aluminum.

Code	Product Name	Page	
SAW	Superior Attic Wing (J-2)
