Ventilation Guide

For Extruded Aluminum Products

Many shapes are available vented to allow for air flow. All vent slots are 1/8" wide by 1" long, spaced 1 1/2" on center lengthwise. Multiple rows of vents are spaced laterally, 1/2" on center. Each lengthwise row of vent slots provides approximately one square inch of venting per lineal foot.

Note: the "V" designation in model numbers indicates vented ability.

Quick Hole Reference

Vent Holes: Are for air flow.

Weep Holes: Are for water/moisture release.

Key Holes: Are to give mud/stucco something to grab on to.
