Fiber Cement Board Moldings
Stockton Products™ now offers a complete line of extruded aluminum moldings for use with 5/16” Fiber Cement Board panels.

Construction using weather-resistant Fiber Cement Board siding has become a popular choice among architects and builders, particularly for extreme weather regions. Known for its versatility, durability and performance, construction using Fiber Cement Board is an excellent choice for all types of commercial projects.

Stockton Products’ line of moldings gives you the ability to enhance the aesthetic look of any Fiber Cement Board project as well as providing a solution for any condition and detail when using this style of construction.

Featuring
- 6063 T5 extruded aluminum
- Standard finish clear anodized
- Other finishes available, contact factory

- 10’ cut length
- Factory curving available
- Factory fabricated intersections available

**CR-FCB: Channel Reveal for Fiber Cement Board**

- Available Vented or No Vents

A decorative reveal used to create an aesthetically pleasing vertical accent between panels. Available vented for soffit venting requirements.

**Note:** Do not use in a horizontal condition.

**F MOLD-FCB: F Mold for Fiber Cement Board**

Creates a decorative reveal in a wall/soffit transition.
